

# 2018/19

PERFORMANCE EQUIPMENT FOR HARSH ENVIRONMENTS

DINGHY YACHT MOTOR DECK INDUSTRIAL

**CYBER  
ESSENTIALS**

3 hole verniers	18	Halyard key shackles B	56	<b>NEW</b> Shock Mitigation & Seat Suspension Units	6
25mm stainless sheave blocks	41	Hanks	34	Shroud adjusters	18/27
Adjustable extensions	13	Harness safety catches	65	Shuttle blocks	44
Adventurer Series grills	77	Hasp and staples	64	Sister hooks	20
Alloy sheave blocks	42	Hatch covers	18	<b>NEW</b> Skydex Quick-Fit Decking	7
Ball Stops	22	Hatch lock	65	Sliders – nylon	35
Big head design	49	Headboards	34	Snap shackles	59
Belaying hook/rope tidy	47	Headboard liner	34	Spar clips and eyes	53
Block accessories adaptors & swivels	45	<b>NEW</b> High Load Block	5	Special clew rings	31
Blocks – 19/28mm carbon fibre cheeked ball race blocks	38	Highfield lever	27	<b>NEW</b> Speed Six	4
Blocks – 25mm	37	Hinges	64	Spinnaker equipment	48
Blocks – 38mm	43	Hooks	53	Spinnaker guy hooks	19
Blocks – 19mm carbon fibre sheaves	43	<b>NEW</b> Infinity Furler	5	Spinnaker pole fittings	19
Blocks – 16mm mini blocks	44	Inglefield hooks	36	Split rings	50
Bow shackles	57	Inner forestay lever	27	Stanchion mounting eyes	52
Brass sheave blocks	42	Key pin shackles	56	Strip shackles	56
Buckles	61/62/63	Kicking strap sets	21	Supersuck bailer	17
Budget chain hook	50	Knives & tool kits	83	Swage terminals	29
Carbine hooks	53/54	Lacing button	36	Swivel anchor connector	50
Carbon fibre roller race blocks	40	Lavac Popular toilet	69/70	Swivel shackle	57
Clamp plates	61	Lavac Popular & Zenith toilet spare parts	71	Tack bar furler	17
Classic Gourmet Series	76	Lavac sanitation pumps	72	Tangs	51
Cleats fairleads & rollers	46	Lavac toilets	69/70	Tape	84/85/86
Clevis pins	50	Link shackles	59	Taylor's heaters – paraffin	75
Clew blocks	31	Marine kettle grills – charcoal	77/78	Taylor's heaters – diesel	75
Cockpit safety eye	65	Marine kettle grills – gas	78	Taylor's paraffin cookers	73/74
Connoisseur Series grills	77	Marine kettle 3 combination stove & gas grill	78	Thimbles	28
<b>NEW</b> Contact Tiller Extension Joints	4	Mounts – rectangular grills & tables	79	Thimble button	28
Cooker spares	74	Mounts – marine kettle grills	79	Tiller extensions	13/14
Cooking accessories	81	Naval bronze boat snaps	56	Tiller extension accessories	14
<b>NEW</b> Clew Block	5	Nicopress ferrules	25	Tiller extension end sets	15
Decks eyes	51	Nicopress hand tool – small	24	Tiller extension joint kits	15
Drop nose pins	49	Nicopress tools	25	Tiller lock	9
D-Rings	32/33	<b>NEW</b> Pad-I	5	Toggle buttons	36
D-Shackles	55/57/58	Pelican hook	29	Toilet spare parts	67
Eye bolts	59	Pintles & gudgeons	10/11	Tournament series cleaning stations	82
Eye plates	52	Reefing blocks	31	Trapeze handles	16
Eye plates – dinghy	21	Rings	32	Trapeze hooks	22
Fastleads	39	Riveters and rivets	26	Trapeze rings	16
Felco cutters	26	Rope stops	22	Trapeze set – complete	16
Forged asymmetric carbine hooks	54	Rudder Accessories	12	Triangles	33
Forged carbine hooks	53	Rudder stocks	8	Triangular plate	30
Fork and eye toggles	30	'S' hooks	53	Turnbuckles	27/29
Fork and fork toggles	30	Saddle washers	47	Twisted shackles	57/58
Furlers	5/17	Sail feeders	20	U-bolts	60/61
Gourmet series cookware	80	Seacocks	68	Universal adapter	70
Gourmet Series grills – infrared	76	Life line link	65	Washers	50
Grill covers	78	Sew on hooks and eyes	36	Wire	24
Gunwhale eyes	52	Shackles – nylon	35	Wire rope grips	29
		Shackle key	59		

# SPEED SIX

- REDUCE FRICTION
- INCREASE PERFORMANCE
- CARBON SHIELD
- FOOD SAFE
- NONCARCINOGENIC
- BIODEGRADABLE

**Part number 60.60**

SPEEDSIX is a highly versatile dry lubricant for all components including the hull surface. Formulated to withstand harsh salt water environments, SPEEDSIX will extend the life of your boat whilst delivering extended performance to all blocks, rollers, sheaves, mast track, furlers and jib cars. SPEEDSIX will lubricate and protect all carbon fibre, wood, nylon, stainless steel, brass, aluminium, leather and composite materials.

**The Green Bit**

SPEEDSIX is powered by ProLan - 100% environmentally friendly, biodegradable, non-carcinogenic and most importantly certified safe to be used within the food chain. Therefore once applied and dried safe for your boat, safe for you and safe for the environment. Lanolin is a natural product (wool wax) from sheep it is the evolution by nature which has given this incredible capability of providing an environmental barrier which is not only weatherproof but extremely low in friction.

# CONTACT TILLER EXTENSION JOINTS

Contact tiller extensions joints have been designed by Derek Clark, a former Americas Cup sailor, designer and current coach to the British Sailing Team to specifically cater for longer tiller extensions. The specially made joint in the contact is 50% larger in diameter making it far stronger for the increased helm loads and length of extension. A simple C shaped clip has been designed so that you can easily remove the tiller extension after racing. Contact has been designed to be used with either 22mm or 25mm.

**Contact 1**

Designed for a single tiller extension, Contact 1 suits fast skiffs with longer extensions such as the Musto Skiff, RS700, RS600 & Contender. The joint faces towards the front of the boat rather than directly upwards. This means that the tiller extension constantly wants to be by the side of the helmsman due to the stiffness of the joint.

**Contact 2**

Contact 2 suits boats such as the 49er, RS800, B14 & Cherub. Contact 2 has the same simple C clip that the contact 1 has which allows for easy removal of the tiller extension. Due to being on top of the tiller in 1 single unit, it allows the helm to be in contact with the extension throughout manoeuvres, rather than dropping and re grabbing as you do with the standard joints. The Stiffness of the joint helps keep the tiller by the side of the helm rather than catching in the waves and being swept out the back of the boat.

P/No	DESCRIPTION	Dim A
23.66s	Contact 1	22mm
23.68s	Contact 1	25mm
23.66	Contact 2	22mm
23.68	Contact 2	25mm

## INFINITY FURLER

### Part Number 25.70

Using the latest 3D printing technology we have designed, tested, improved and produced a new code zero continuous line furler for small dinghies, catamarans and inflatable boats. From the outset our aim was to improve on the units that are currently on the market. We believe we have achieved this by incorporating our current 316 Stainless Steel central column from our drum furler, and designing a completely new outer casing and drum. The top of the drum has large tear drop holes to help grip the rope for minimal slip, and to reduce the overall weight. By using our existing central column and bearings it means that we have a unit that has been tried and tested for the last 25 years, and has a significantly higher working and breaking loads (1000Kg) compared to other continuous line furler's of comparable size on the market today as they are mainly all plastic. The Infinity furler is extremely light at only 135 grams showing that there has been no compensation for weight/strength.

## CLEW BLOCK

### Part number 04.90NEW

The new 04.90 has had a small facelift from the previous 04.90 that has more than proven itself for over 30 years. The 3 stainless rivets have been removed and replaced with 1 large central hollow rivet. This makes the product more aesthetically pleasing and slightly lighter, however it still has the same working and breaking loads meaning that compared to other manufacturers clew blocks ours still have the highest load capabilities. We are also able to anodise the block in a large range of different colours and manufacture the plastic components including the sheave, slot protectors and the central bush in different colours to fit in with the sail maker's company marketing schemes.

## ULTRA HIGH LOAD BLOCK

### Part Number 01.66

On boats such as an International Moth the vang system can produce loads in excess of 1000kg. We have produced a light weight Ultra High Load block that has a breaking load well in excess of 2000Kg. The block incorporates 4mm SK99 Dyneema which takes a large proportion of the loading due to the innovative design. The Ultra Block uses a Toughmet spinodal plain bronze bearing which has an extremely wide working temperature range as well as having very low friction.

As well as having a breaking load over 2000Kg, probably the most astounding feature of our Ultra Block is that it only weights 39 grams. Available in a range of colours – Black, Silver, Blue, Purple, Gold.

## PAD-I

### Part number 25.20

PAD-I has been designed to allow you to fix low loading parts to your boat/deck without having to drill attachment holes. PAD-I has been manufactured using carbon filled nylon so it is extremely strong. It comes complete with a length of 1.5mm SK99 Dyneema which means that the whole unit only weight 5.5 Grams.

The PAD-I is stuck to the hull/deck using Sikaflex. PAD-I is able to take 80kg's of force before lifting from the deck. This makes putting simple take up systems into the boat extremely easy.

### Dimensions

Diameter 32mm  
Height 8mm  
Weight 5.5grams

# SHOCK MITIGATION & SEAT SUSPENSION UNITS

## Shock Mitigation by all Means

Born out of a personal wish to have a safer, more comfortable ride aboard a motor boat, our shock mitigation units significantly reduce the shock on the body from harsh wave impacts.

We have been manufacturing solid dependable marine and aerospace equipment for more than 50 years. This experience of developing, testing and refining products to survive in harsh marine environments has been key to our success. Our units are now being used all over the world in personal and light commercial craft.

To complement our own equipment we have teamed up with SKYDEX Inc, world leaders in advanced impact mitigation and cushioning solutions to provide shock mitigation seating with built in SKYDEX seat inserts, and a shock mitigating decking to give a complete whole body vibration (WBV) solution for water craft whether standing or sitting.

Our system has been designed to be easily retro-fittable with little to no alterations needed on the boat. This is by far the most cost effective way of meeting the current WBV legislations.

For more information regarding our RIB and Pedestal based systems please call 01489 885 401 or email: [sales@sea-sure.co.uk](mailto:sales@sea-sure.co.uk)

We have a vast amount of performance data, please contact us directly with your application and we will be more than happy to help.

## Benefits

- Proven Performance
- Retro-fit Design
- Increased comfort
- Low cost

## Designed for

- Leisure use
- Coach Boats
- Commercial/Coastal/SAR use
- Coastguards & Pilots

## Extensively Tested

- In-house drop test facility
- In-house static testing
- On water testing

# SKYDEX QUICK-FIT™ DECKING

Superior  
Shock Mitigation

Simple, In-Field  
Installation

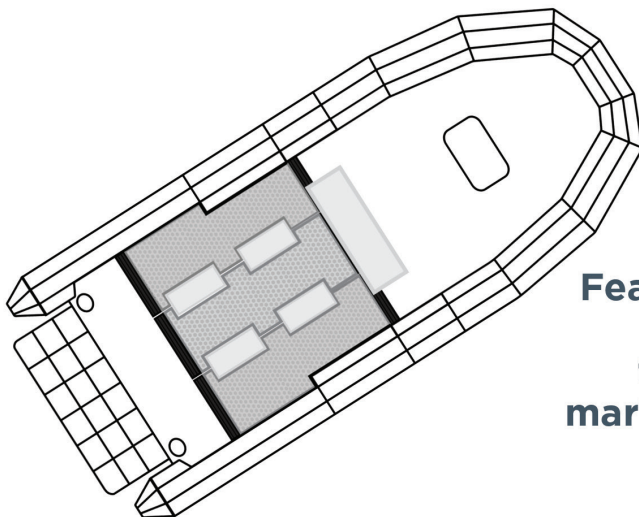

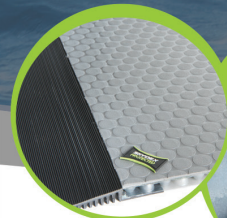

High-Speed  
Impact Protection

Whole-Body  
Vibration Reduction

Durable and  
Long-Lasting

Features **SKYDEX** patented impact and cushioning technology trusted by boat builders and marine craft users for over a decade.

# DINGHY, TRANSOM & RUDDER

Our rudder fittings are renowned as being the best in the world. Tough, lightweight and durable they remain the no.1 choice for performance dinghy builders and sailors alike.

In this section you will find everything you need for steering any Dinghy, Sportsboat, Dayboat or small keelboat.

We manufacture over 120 different designs of Rudder Stock. Please enquire to see our full range.

**DESIGNED AND MANUFACTURED BY SEASURE**

# TILLER LOCK

The new version maintains the rugged reliability of the original and brings the design fully up to date.

- New design suitable for any tiller steered yacht or sports boat.
- Simple mechanism allows tiller to be set and adjusted – indispensable for short-handed sailing.
- Innovative design incorporates snubber which holds far better course than simply lashing tiller.

P/No	DESCRIPTION
19-27	Tiller Lock

A variety of methods for fixing or locking the tiller have been used over the years and many have only been adequate. Improvements in performance involving short keels and dagger rudders - often transom hung - suffer from an unfortunate handicap. With no skeg, no shelf, but with a sensitive rudder a boat will fall off her elegant balancing act if the helmsman lets go of the tiller. The increased sensitivity and faster response of newer boat designs calls for a better system. Such a system should:

1. Allow precise locking of the tiller with minimum difficulty.
2. Be quick and simple to operate when locking and particularly when releasing.
3. If possible, the system should be able to be detached instantly from the tiller in the event of any emergency.

The **TILLER LOCK** rope lock was designed to meet these points.

The device consists of a sheave and lever cam with a toothed slider mounted in a block which is fitted beneath the tiller. The rope is fitted across the after part of the cockpit with a means of keeping it under tension. When locked on to the rope the toothed slider prevents the tiller from moving in either direction.

Releasing the lock (by turning the lever to port) immediately frees the tiller and allows the rope to ride freely over the sheave for manual steering. In an emergency or when the device is not required, the rope can easily be snapped out of the block by a downward pull, clearing the tiller.

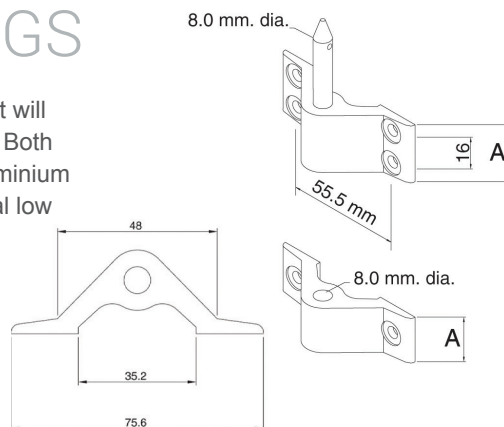

# 8mm (5/16") TRANSOM FITTINGS

The choice of champions! Fitted by top sailors around the world, when only the best will do. SeaSure rudder fittings are precision machined, tough, reliable and lightweight. Both pintles and gudgeons are manufactured from a heat treated corrosion resistant aluminium alloy, with hard grey finish for complete protection. Precision machining and optional low friction carbon bushes eliminate undesirable play in the rudder system. Pintles are brackered for added rigidity and absolute security. Spare bushes (part number: 18-39) are available for gudgeons.

Use packing pieces to achieve correct stock size (shown opposite).

- Range of sizes to fit many types of dinghies.

# ADJUSTABLE EXTENSIONS

## SURESTIK

Developed for sports boats and tiller-steered yachts, the SureStik has been designed for smooth adjustment and optimum strength to weight ratio.

Uniquely, these adjustable tiller extensions have the release button positioned in the top of the handle, so no need to take your eyes off the racing mark when adjusting the length. The use of Multiflex® for the ergonomically designed handle provides comfort for extended cruising and non-slip grip, even when wet. Now with straight handled version of this popular range.

P/No	DESCRIPTION	CLOSED	OPEN

# TRAPEZE GEAR

SeaSure manufactures a wide range of trapeze gear to suit all types of dinghy and levels of ability. Our new range of handles, rings and hooks extends the range still further. The wide number of options available means that you can design the arrangement which most suits you and your boat. The new button grips are available in two sizes and six different colour combinations for increased colour co-ordination within the boat. Electro-polished 316 Stainless steel is used throughout the range to ensure that the highest degree of corrosion resistance is achieved.

## TRAPEZE HANDLES

**19-35 & 19-35A** Strong and simple open handle features tubular up-stand for comfortable use on wire. Can be supplied with or without a becket for fitting adjustment gear directly below handle.

**19-37 & 19-37A** Strong, comfortable and lightweight. They are manufactured from stainless steel with a wide power-grip handle.

They can be supplied with or without sheaves depending on your trapeze arrangement.

**19-31 & 19-32** A new range of simple and very light weight handles available in six colours and either 52mm diameter or 65mm diameter to suit different hand sizes.

## TRAPEZE RINGS

**19-30** Two-position ring with central bar to attach shock cord that ensures the ring is held in the correct position ready for use. Weight: 75g.

**19-33** Similar to 19-30 but with parallel "grab" section and angled for ease of hooking on. Weight: 60g.

**19-34** A compact lightweight ring with built in sheave for use on continuously adjustable systems. Weight: 50g.

**19-29** New wide end for maximum hook target. It has a central shock cord bar and is angled to put it in position and directly to hand. There is also a parallel section for ease of handling. Weight: 64g

## COMPLETE TRAPEZE SET

**19-38** Complete trapeze set, ready to fit trapeze wire and retaining shock-cord. Set comprises 19-37A, 19-34, 00-13 and spliced terylene line.

**19-45** High performance trapeze set. Set comprises 19-35, 19-34, cleat and 1.5m high performance rope.

# SUPERSUCK BAILER

Few dinghies can sail fast enough to windward, particularly in rough weather or half full of water, for a wedge type bailer to operate well.

Based on the venturi principle the Supersuck bailer literally sucks the water from the boat even at low speeds. It has a higher pumping capacity than traditional bailers and creates less drag. This means you have a lighter boat which accelerates more quickly than the opposition giving real race advantage.

The bailers have a robust construction, using 316 stainless steel and high grade plastics for a long trouble free life.  
Weights: 187g (19-90); 220g (19-92)

Note:

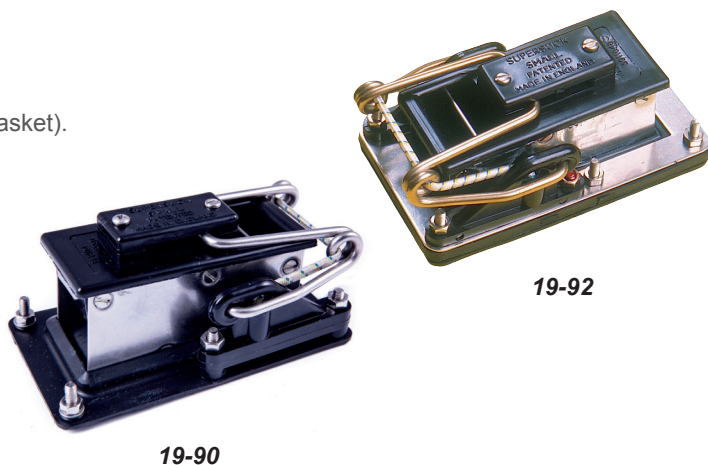

Seal kit for 19-90 externally mounted bailer is 19-93 (seal only).

Seal kit for 19-92 internally mounted bailer is 19-91 (seal kit & gasket).

**Internally and externally mounted versions available.**

**Simple and efficient**

P/No	DESCRIPTION
19-90	Externally mounted bailer
19-91	Spare seal kit for 19-92
19-92	Internally mounted bailer
19-93	Spare seal kit for 19-90

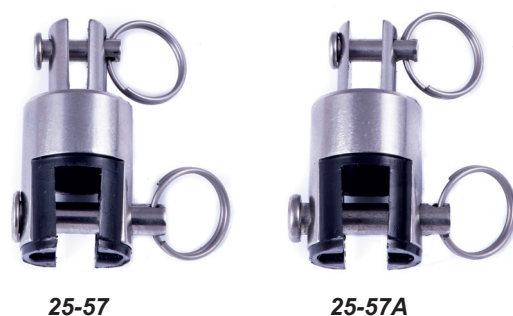

# FURLERS

The SeaSure jib furler is designed for complete reliability. The drum is completely enclosed to prevent rope from coming off and jamming during operation. It also features an all stainless steel thrust bearing so that it still operates easily when the forestay is fully tensioned. Being less than 50mm between centres allows the jib to be set very low to the deck for maximum sail efficiency. It can also be mounted below the deck using an additional stainless steel extension tube. The furler will take up to 3.5m of 3mm line allowing it to be used on sails with a foot length of approximately 3m (this is reduced if larger diameter line is used). Drum Diameter: 69mm Weight: 116g (25-54)

Our head swivels are fitted with stainless steel balls and bronze seats for low friction and long life. They are available in two sizes and are fitted with anti chafe inserts for added sail protection. Weights: 53g (25-57); 48g (25-57A)

P/No	DESCRIPTION
25-54	Dinghy jib furler
25-57	Head swivel with 4mm top slot
25-57A	Head swivel with 6.5mm top slot
25-58	Spare casing for 25-54

# TACK BAR FURLER

The Tack Bar Furler combines 2 fittings into 1 combining SeaSure's bronze and stainless thrust bearing jib furler reliability, with a smooth snag free spinnaker chute entrance.

## HATCH COVERS

These are high quality strong hatch covers. They are fitted with an "O" ring seal which provides an excellent waterproof fitting when the lid is screwed on. The outer flange has ample strength with a ribbed underside for mastic sealant.

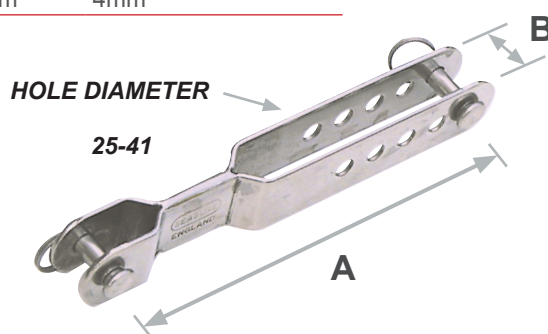

P/No	DESCRIPTION
18-70B	110mm (4") black cover complete with 'O' ring
18-70W	110mm (4") white cover complete with 'O' ring
18-71	110mm (4") 'O' ring
18-72B	157mm (5") black cover complete with 'O' ring

P/No	DESCRIPTION
18-72W	157mm (5") white cover complete with 'O' ring
18-73	157mm (5") 'O' ring
18-76	110mm (4") clear cover complete with 'O' ring
18-78	157mm (5") clear cover complete with 'O' ring

## SHROUD ADJUSTERS

P/No	DESCRIPTION	DIM 'A'	DIM 'B'	HOLE DIAMETER
25-41	Adjusts from 60mm to 95mm in 5 steps	96mm	11mm	4mm
27-25	Adjusts from 30mm to 70mm in 5 steps	68mm	7mm	4mm

## 3 HOLE VERNIERS

Race developed for the skiff market.

- Allows far more adjustment to be made to the caps and lowers without crossing or interference.
- Feature a reinforced base for added strength.
- Supplied with fast-pins for ease of adjustment on the water.

P/No	DESCRIPTION
27.10	Hole shroud vernier

# SPINNAKER POLE FITTINGS

A truly robust range of end fittings. Fabricated from 316 stainless steel they are very durable and capable of survival even in the toughest conditions.

# SPINNAKER GUY HOOKS

*Positioned close to the shrouds, these hooks retain the spinnaker guy when reaching or running.*

P/No	DESCRIPTION
16-13	Spinnaker guy hook
16-15	Spinnaker guy hook with integral bolt
25-92	Spare rubber for 16-13 & 16-15

16-13

25-92

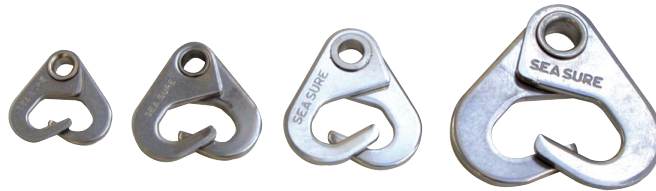

16-15

## SISTER HOOKS

These innovative self locking hooks which have numerous applications for either racing or cruising.

- Manufactured from 316 stainless steel for strength and corrosion resistance.
- Used as replacements for quick links and shackles where fast disconnection is needed.

<b>P/No</b>	<b>OVERALL LENGTH</b>
16.42	25mm
16.44	31mm
16.46	38mm
16.48	50mm

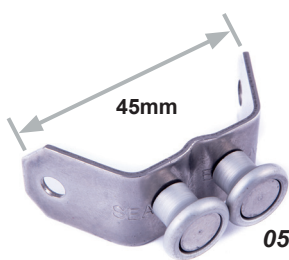

## SAIL FEEDERS

Sail feeders available to suit 6, 8 and 12mm luff bolt rope. The aluminium rollers guide the bolt rope into the mast groove eliminating twisting or snagging, making mainsail hoisting a one man operation.

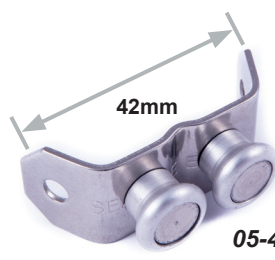

<b>P/No</b>	<b>DESCRIPTION</b>	<b>DIMENSIONS</b>	<b>MAX LUFF DIA</b>

# TRAPEZE HOOKS

P/No	DESCRIPTION	WEIGHT
19-39	Lace-up trapeze hook	151g
19-40	Spreader bar for 50mm webbing	293g
19-40A	Spreader bar for 40mm webbing	273g
25-93	Spare rubber for trapeze hooks	13.5mm

**19-39**

Lace-up hooks allow considerable adjustment for extra comfort. Manufactured from electro-polished 316 stainless steel the hook has a reinforced web for maximum strength.

**19-40 & 19-40A**

These strong and lightweight spreader bars improve comfort when hiking out and allow for ease of adjustment. Suitable for 50mm and 40mm webbing.

# ROPE STOPS/BALL STOPS

A complete range of 4 sizes and 6 colours so that control lines within the boat can be colour coded. They are counter bored one end to take a stopper knot. Available in Black, Red, Yellow, Green, Blue and White.

# YACHT, SAIL, RIG, DECK & MANUFACTURING

For more than 50 years we have been designing, developing and manufacturing at our ISO9001 certified production facility in Hampshire, UK. We produce a wide range of high performance stainless steel, aluminium, plastic and carbon hardware for the marine and aerospace industries.

With a dedicated research and development team and the aid of 3D CAD software, we are able to develop ideas and then produce reliable, innovative and world class products.

With many design awards nominations in recent years, we believe the high standards of design, engineering and manufacturing we strive for have been recognised.

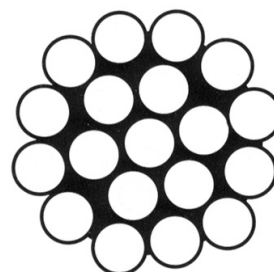

DESIGNED AND MANUFACTURED BY SEASURE

## 316 STAINLESS STEEL WIRE 1 X 19

High quality Stainless Steel wire for all marine and outdoor applications. 1 x 19 construction is low stretch and ideal for all standing rigging applications such as shrouds, forestays and guardrails.

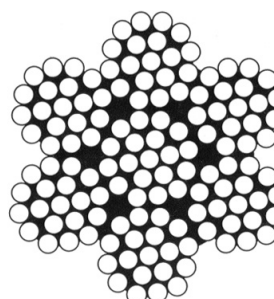

PART NO.	TYPE	SIZE DIAM	REEL LENGTH
42.00 eu	1 x 19	2mm	250m

## SMALL NICOPRESS HAND TOOL

P/No	DESCRIPTION
10-00/07	Small hand tool to swage ferrules onto 2mm and 2.5mm diameter wire.

# NICOPRESS TOOLS

**Nicopress**

Our extensive range of Nicopress tools and ferrules allow quick and simple termination or eye splicing of wire and synthetic ropes. The system is well proven, having been used in the aviation and yachting industry for 50 years.

Ferrules are available in zinc plated copper for use with stainless steel cable, or in aluminium for use with galvanised steel cable.

Either bench or hand tools can be used to terminate the ferrules, and with all but the small hand tool, various heads can be fitted to the handles to accommodate differing ferrule sizes.

NOTE: A good Nicopress swage will be 95% of the strength of the wires breaking load.

# INNER FORESTAY LEVER

Fabricated from 316 stainless steel this well tested reliable design is tough and strong.

As well as being used for inner forestays they can also be used as a safety device on boats fitted with furling head sails allowing a storm jib to be flown in an emergency.

Essential for fast assembly of inner forestays in bad weather conditions.

Uses

- Inner/Emergency forestays
- Security tenders and lifeboats

# BLOCK RANGE

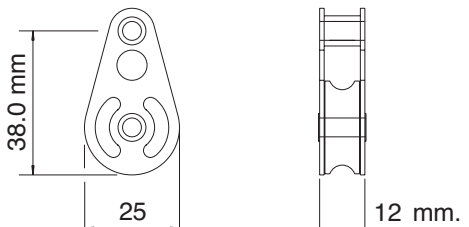

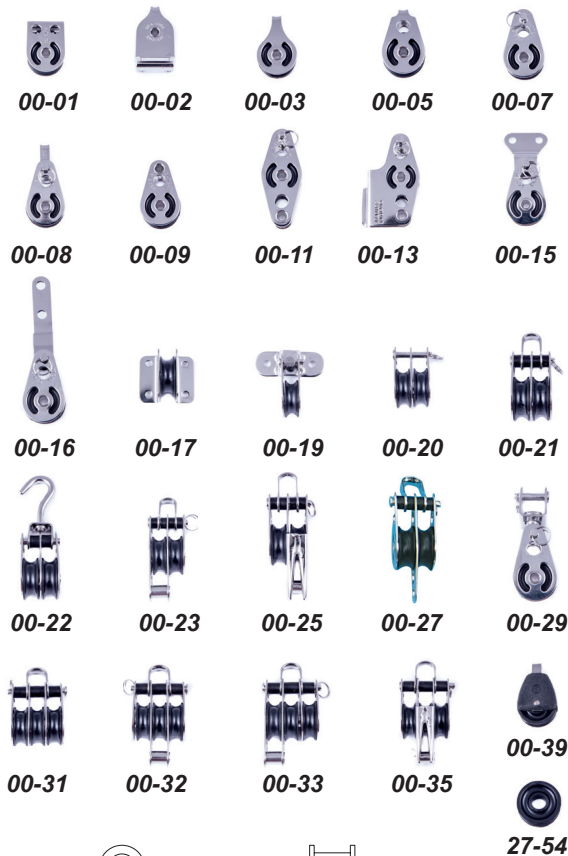

SeaSure manufacture an extensive range of blocks, all of which have been tested in the most extreme race conditions and proven over time. Once you have decided on the layout of your control lines these key elements will help you select the most suitable block:

- The type and size of rope or wire to be used.
- The sheave material – depending on the use of either rope or wire.
- The bearing type – depending on the operational loads being taken.
- The body construction – often determining the ultimate load carrying capacity and weight of the block.
- The ultimate breaking load.
- The block weight.

## 25mm BLOCKS

- A range of control line configuration opportunities.
- The high strength to weight ratio and simple construction gives years of trouble free service.
- They feature hollow rivets for lightness and tough plastic sheaves that provide a good bearing surface allowing easy rotation.
- Electro-polished 316 stainless steel construction.

**Rope Sizes & Types:** Up to 8mm; standard 3 strand or plaited nylon, polyester and polypropylene ropes.

**Sheave:** Tough “Arnite” plastic

**Bearing:** Plain – low friction plastic onto s/steel.

**Body construction:** Electro-polished 316 s/s with hollow rivet.

**Weights:** 18g(00-07) to 49g (00-31)

**Typical uses:** Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams traveller control lines, leech lines, dinghy spinnaker sheets, guys and halyards.

# 19 & 28mm CARBON FIBRE CHEEKED BALL RACE BLOCKS

SeaSure have been producing some of the worlds most reliable control line blocks for more than 25 years. This latest development with carbon fibre cheeks make them super hard wearing if a miss-lead occurs.

- Light weight, high load carrying capacity blocks.
- Reliable race proven designs.
- High wear resistant cheek material extends life if miss-lead occurs.
- Freewheeling for fast line take up.

Rope Sizes & Types: 6mm & 8mm, Dyneema, Spectra or Kevlar; 3 strand or plaited nylon, polyester and polypropylene ropes.

Sheave: Self lubricating graphite loaded POM.

Bearing: Stainless steel balls with carbon fibre hub and cage.

Body construction: Carbon fibre with 316 stainless steel strap.

Weights: 13g (19-74); 118g (28-82).

Typical uses: Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams, traveller control lines, leech lines spinnaker sheets, guys and halyards.

# FASTLEADS

FastLeads can be used for a variety of rope lead applications on both racing and cruising yachts.

With the increasing use of advanced aramid ropes, FastLeads have been developed with smooth surfaces to offer a high strength 'all direction' lead.

Developed initially for high performance racing yachts and proven in action on board TP52 yachts, FastLeads can be used as high load rope tidys around the deck. With large eyes they are ideal for securing a floating block when required.

With smooth surfaces in all directions FastLeads will not chafe control lines or halyards.

Produced from precision CNC machined aircraft grade aluminium and with a highly polished PTFE impregnated finish, there are no drill holes on the outer surface.

FastLeads are secured through the base with stainless machine screws for ultimate strength.

# CARBON FIBRE ROLLER RACE BLOCKS

These simple yet strong blocks are low weight and operate well under a wide range of load conditions. The use of carbon fibre needle roller bearings means that they run well even under high loads whilst freewheeling under light loads for fast line take-up.

Typical uses: Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams, traveller control lines, leech lines, dinghy spinnaker sheets, guys and halyards.

The 09-60 and 29-60 are designed for "In-boom" reefing systems and feature soft rubber type bodies to prevent damage and reduce noise within the boom. Also available with black sheave.

## 09-XX RANGE (28MM DIAMETER SHEAVES)

Rope Sizes & Types: All types up to 8mm (10mm max)  
 Sheave: Acetal  
 Bearing: Densely packed carbon fibre needle rollers  
 Body construction: Acetal banded with 316 s/steel strap  
 Breaking Loads: 500kg (09-02)  
 Weight: 29g (09-02)

P/No	DESCRIPTION	WEIGHT
09-01	Single block with shackle	34g
09-02	Single block with clevis pin	29g
09-03	Single block with becket	42g
09-04	Quarter lead block, short base	39g
09-05	Quarter lead block, long base	38g
09-06	Single block with hanging swivel	49g
09-07	Base mounted swivel block	47g

29-60	Inside boom single line reefing block	138g

### 39-XX RANGE (50MM DIAMETER SHEAVES)

Rope Sizes & Types: All types up to 12mm (14mm max)  
 Sheave: Acetal  
 Bearing: Densely packed carbon fibre needle rollers  
 Body construction: Acetal banded with 316 s/steel strap  
 Breaking Loads: 1,600kg (39-02) ; (39-10)

*The 39-XX range is available with aluminium sheaves to suit wire rope.*

*To order, add suffix 'A' to the part number (eg: 39-02A)*

P/No	DESCRIPTION	WEIGHT	P/No	DESCRIPTION	WEIGHT
39-02	Single block with shackle	137g	39-05	Single block with hanging swivel	180g
39-03	Single block with becket	157g	39-10	Double block with shackle	220g

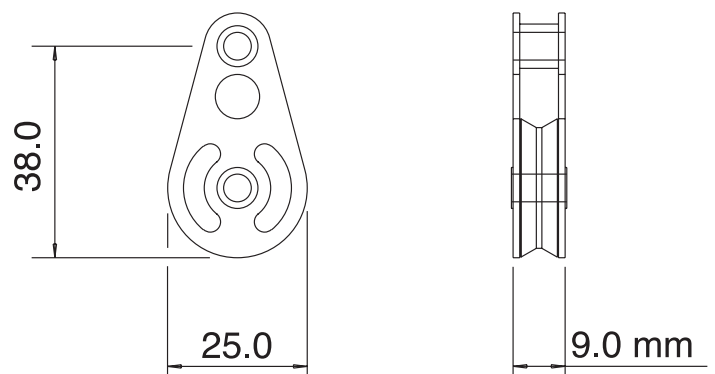

### 25mm STAINLESS SHEAVE BLOCKS – BALL RACE

These ball race blocks are designed to take high loads and be very light. They have a double row of captive stainless steel balls running within a stainless steel sheave. This ensures minimal deflection of both ball and housing helping prevent "dig in" under high loads.

Rope Size/Types: 4mm wire, Dyneema, Spectra or Kevlar  
 Sheave: 316 stainless steel  
 Bearing: Double row stainless steel ball  
 Body construction: Electro polished 316 s/s with hollow rivet  
 Breaking Loads: 950kg (01-32)  
 Weights: 32g (01-32)  
 Typical uses: Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams, traveller control lines, leech lines.

P/No	DESCRIPTION
01-30	Single block with shackle
01-32	Single block with clevis pin
01-34	Single block with becket
01-36	Single block with hollow rivet
01-38	General purpose block
01-40	Single bolt down block

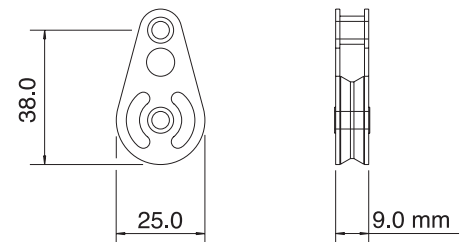

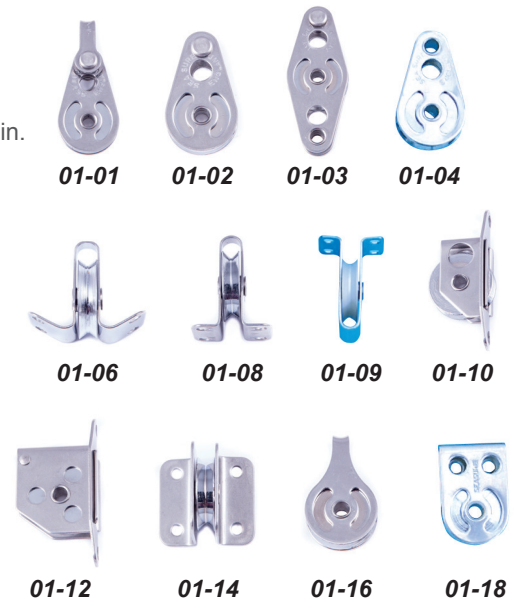

# BRASS SHEAVE BLOCKS

For use in high load applications such as those imposed by wire and Dyneema halyards. The stainless steel side plates prevent highly abrasive ropes from cutting in.

Rope Sizes & Types: 4mm wire, Dyneema, Spectra or Kevlar  
 Sheave: Chrome plated brass  
 Bearing: Plain – chrome plated brass onto s/steel  
 Body construction: Electro polished 316 s/s with hollow rivet  
 Breaking Loads: 950kg (01-02)  
 Weight: 35g (01-02)  
 Typical uses: Halyards, outhauls, kicking straps, cunninghams, traveller control lines, leech lines.

P/No	DESCRIPTION
01-01	Single block with shackle
01-02	Single block with clevis pin
01-03	Single block with becket
01-04	Single block with hollow rivet
01-06	Spar mounted block (Curved lugs)
01-08	Spar mounted block (Flat lugs)
01-09	Wire guide block (Aluminium sheave)
01-10	In line fixing mast sheave (Small side plates)
01-12	In line fixing mast sheave
01-14	Deck lead block
01-16	General purpose block
01-18	Single bolt down block

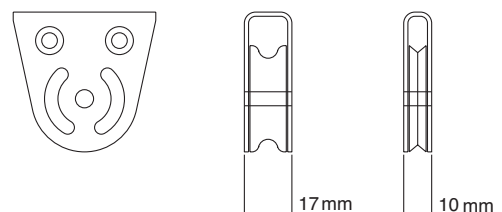

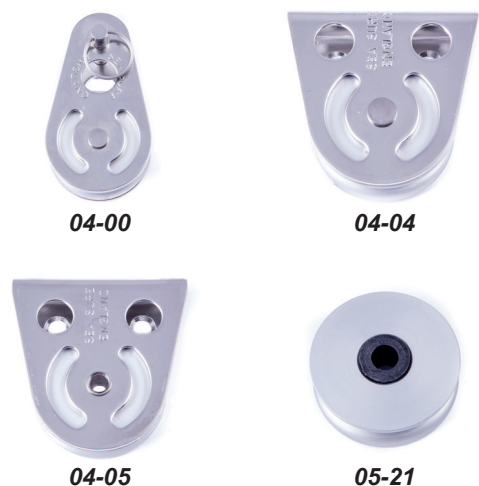

# ALLOY SHEAVE BLOCKS

These blocks have aluminium sheaves and are for use with wire and aramid type ropes when very high loads are involved. They feature a plain bearing on carbon fibre bush for trouble free use under load.

Rope Sizes & Types: 6mm & 8mm, wire, Dyneema, Spectra or Kevlar  
 Sheave: Aluminium  
 Bearing: Plain – carbon fibre bush on 316 s/s pin  
 Body construction: 316 stainless steel  
 Breaking Loads: 1,600kg (04-00); 2,400kg (04-04); 850kg (04-05)  
 Weights: 76g (04-00); 79g(04-04); 61g (04-05)  
 Typical uses: Halyards, outhauls, kicking straps, cunninghams, traveller control lines, leech lines

P/No	DESCRIPTION
04-00	Single block with clevis pin
04-04	Bolt down block 17mm wide
04-05	Bolt down block 10mm wide
05-21	Sheave only (Supplied with bush)

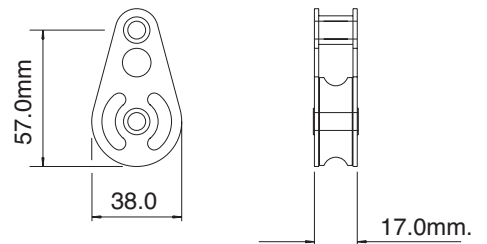

# BLOCKS

## 38MM BLOCKS

These are tough general purpose high load blocks. They have a similar classic design to the 25mm range but have very high load carrying capacity. Their simple construction and plain bearings means they are long lasting and require very little maintenance.

Rope Sizes & Types: Up to 10mm; standard 3 strand or plaited nylon, polyester and polypropylene ropes.  
 Sheave: Tough "Arnite" plastic  
 Bearing: Plain – low friction plastic onto stainless steel  
 Body construction: Electro-polished stainless steel  
 Breaking Loads: 1,400kg (03-01)  
 Weights: 64g (03-01)  
 Typical uses: Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams, traveller control lines, leech lines, spinnaker sheets, guys and halyards

P/No	DESCRIPTION
03-00	Single block with shackle
03-01	Single block with clevis pin

## 19MM CARBON FIBRE SHEAVES

A tough micro block designed for abrasive ropes and high loads. Because of its plain bearing design it will operate well under a wide range of load conditions.

Rope Sizes & Types: 4mm wire, Dyneema, Spectra or Kevlar  
 Sheave: Carbon Fibre  
 Bearing: Plain – Carbon Fibre onto stainless steel  
 Body construction: Electro polished 316 s/s with hollow rivet  
 Breaking Loads: 400kg (02-05) to 600kg (02-10)  
 Weights: 10g(02-05) to 18g (02-10)  
 Typical uses: Control lines, halyards, outhauls, kicking straps, furling lines, cunninghams, leech lines

P/No	DESCRIPTION
02-01	General purpose block
02-02	Base-mounted block
02-05	Single block with hollow rivets
02-06	Single block with clevis pin
02-07	Single block with shackle
02-09	Single sheaved cage block
02-10	Double block
02-11	Double block with becket
02-13	Double sheaved cage block
02-21	Single swivel block

# BLOCKS

## 16MM MINI BLOCKS

Rope Sizes & Types: Up to 5mm – POM sheave - all ropes  
Stainless steel - wire ropes

Sheave: POM (02-14), stainless steel (02-15)

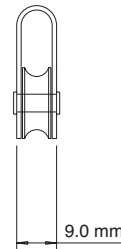

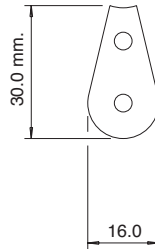

Bearing: Plain onto stainless steel pin

Body construction: 316 stainless steel

Breaking Loads: 175kg(00-40); 175kg(00-41)

Weights: 7g (02-14); 10g (02-15)

Typical uses: Lead blocks for a wide range

**02-15**

P/No	DESCRIPTION
02-14	Mini block with 16mm dia. plastic sheave
02-15	Mini block with 16mm dia. s/steel sheave

# SHUTTLE BLOCKS

These Phil Morrison designed line mounted shuttle blocks have a wide range of control line applications. The carbon fibre sheave is particularly hard wearing and suitable for modern aramid type ropes. Their soft moulded shape is designed to be snag free and protect against damage around the cockpit.

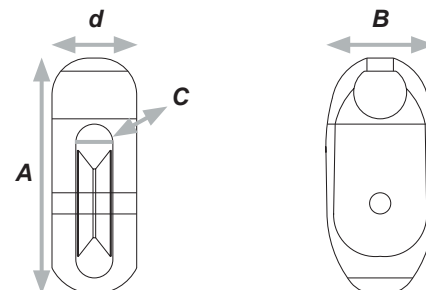

Rope Sizes & Types: 4mm (00-40) & 6 mm (00-41) Dyneema, nylon, polyester & polypropylene

Sheave: Carbon fibre

Bearing: Plain – carbon fibre onto stainless steel pin

Body construction: Nylon

Typical uses: Lead blocks for a wide range of control line applications

IDEAL FOR ALL  
LAZY JACK  
APPLICATIONS

# BLOCK ACCESSORIES, ADAPTORS & SWIVELS

## DECK, MAST AND STANCHION BLOCKS

These 316 stainless steel bodied turning blocks offer a range of stanchion mounting configurations. They are particularly useful for running furling headsail lines back to the cockpit. They are low maintenance and will continue to look good for years to come.

The hinged action allows the nylon sheave to pull into line as rope leaves the furling drum.

The rail mounted stanchion base (03-40) is designed so that no holes have to be drilled in the deck, significantly reducing the number of possible leakage points in the boat. Manufactured from 316 stainless steel and electro-polished to a high finish for better resistance.

To fit stanchion diameter 25mm (1").  
Suitable for up to 10mm diameter rope.

P/No	DESCRIPTION
03-40	Stanchion base (Toe rail mounting)
03-45	Replacement sheave for 03-48/50/51/52/53 25mm dia. sheave
03-48	Deck or mast mounted block with removable sheave
03-50	Stanchion mounted block used with furling rope
03-51	Similar to 03-50, but used on sharply angled stanchions
03-52	Toe rail mounted block. Similar to 03-50, but with flat base
03-53	Deck mounted block with 2 position sheave
03-55	Heavy duty mast block with removable plastic sheave 38mm dia. sheave
03-55A	As 03-55 with removable aluminium sheave
03-65	Stanchion mounted fairlead.

## ADAPTOR SHACKLES AND SWIVELS

Designed to fit the SeaSure 25mm and 38mm blocks ranges. They are manufactured from 316 stainless steel with low friction bearing washers for ease of movement under load.

P/No	DESCRIPTION
05-05	Swivel for use with blocks in the 25mm range
05-07	Base mounted swivel for use with blocks in the 25mm range
05-09	Hanging swivel for use with single and treble blocks in the 38mm range

19-09	240mm	8.0mm	76.0mm	157g

## CONTROL LINE CLEATS

These small cleats are excellent for a wide range of control line cleating applications. They are suitable for all types of line up to 6mm. Their aluminium spindle-grip means they are very hard wearing and have minimal run-back after cleating. They are also very light weight at only 20g each.

P/No	DESCRIPTION
19-10	Right hand cleat with hoop
19-11	Left hand cleat with hoop
19-13	Right hand cleat without hoop
19-14	Left hand cleat without hoop
19-16	Tapered packing piece for use with above cleats

## BELAYING HOOK/ROPE TIDY

The belaying hook provides convenient stowage for halyards and hanks of line. Moulded in polypropylene, the hook is available in black, red, green and white and is supplied with a metre of line and a self-tapping screw.

P/No	DESCRIPTION
25-29BLK	Black belaying hook
25-29RED	Red belaying hook
25-29GRN	Green belaying hook
25-29WHI	White belaying hook

# SPINNAKER EQUIPMENT

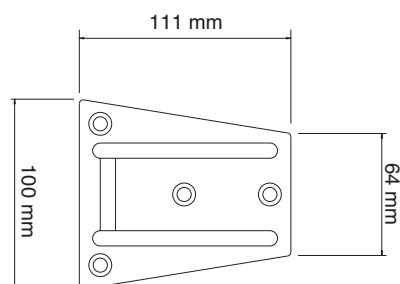

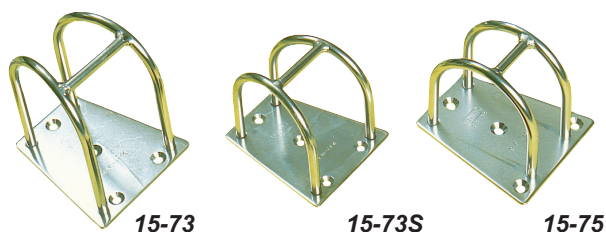

## SPINNAKER POLE STORAGE BRACKETS

We manufacture a wide range of stowage brackets. All are manufactured from electro polished 316 stainless steel for a long, corrosion-free life. The flexible bracket can be used in places where crew may stand on them or where reduction in noise inside the boat is required.

P/No	DESCRIPTION	I/D OF RING
15-71	Stanchion mounted bracket (For 25mm dia. stanchion)	
15-72	Stowage bracket with ring	65mm
15-72S	As 15-72 with lower positioned ring	65mm
15-88	Packing piece for 15-86

15-30	Spinnaker pole end to fit 50mm o/d tube	321g
16-60	Up-haul / down-haul band for 51mm diameter pole	70g

# DROP NOSE PINS

Manufactured from 316 stainless steel and barrel finished for a smooth, high shine surface finish. We produce a wide range of pins from 20mm to 120mm long and between 6mm and 12mm diameter.

They have a spring loaded mechanism that positively locks the pin in either the open or closed position. The head features an annular groove for attachment of a retaining wire if required for larger bespoke pins and retaining wires. Call for quotation!

# CONCEPT U-BOLTS

It is difficult to believe that so many new and patented features could be included in a "U" bolt! The "Concept" range have been designed from first principles to offer unrivalled levels of protection from water ingress. They also include many features to enable fast and neat fitting, reducing installation costs for boat builders.

Patent Seal on Stainless Bolts

Features include:

- Unique deck seal for maximum protection from water ingress (patent applied for).
- Specially designed sealant pocket and slotted base plates for faster neater installation.
- New cup design evenly distributes load for maximum strength, durability and improved sealing capability (patent applied for).
- Manufactured in the UK by SeaSure from top grade 316 Stainless Steel for guaranteed quality.

# BUCKLES

We manufacture a wide range of buckles for use on trapeze and safety harnesses as well as life jackets. They can also be used for adjusting the tension of webbing wherever it is used on the boat including toe straps. The frames are manufactured from 316 stainless steel for strength and corrosion resistance. The crossbars are available in plastic or black anodised aluminium depending on loading requirements.

# HASP AND STAPLES

A stylish range of hinges fabricated in 316 stainless steel and electro-polished for a long lasting high finish. The pins of the hinges and hasps and staples are welded in position for added security. The anti-rattle hasp and staple is designed for those who would like to get some sleep on their boat. The staple is fitted with pads to give a unique anti-rattle feature. The twist lock is also fitted with a carbon washer to ease the twist and lock mechanism.

## HATCH LOCK

P/No	Description
23-35	Used to secure the sliding hatch to the washboards, this hatch lock can be operated from the cabin or the cockpit. Provision for padlock. Suitable for washboards up to 19mm thick.

# ON-BOARD COMFORT & DISTRIBUTION

Blakes of Gosport can trace it's origins as far back as 1792, building equipment for Nelson's navy.

Classic Blakes & Taylors cookers, heaters and toilets are now built by us here in Warsash.

Along with these beautiful, individually crafted, iconic pieces we distribute other products for discerning yachtsmen and women. Our aim is to provide the best products from around the world that make the stay or journey on your boat even better.

We are always up-dating these products and ranges, so please contact us for the latest information and availability.

# MARINE TOILETS & SEACOCKS

Classic sea toilets and seacocks, hand built to the highest standards.  
A thing of beauty that stands the test of time.

## Blakes OF GOSPORT

Blakes Baby and Victory marine toilets are hand-built, using the finest, marine grade materials to withstand the rigours of marine environment. Offering yachtsmen all over the world an exceptionally long working life Blakes marine toilets are renowned throughout the sailing fraternity. The reliability of the simple classic design is such that original models from the 1920's are still in use, and 30 to 40 year old examples are common.

### Features:

- Castings manufactured in bronze to give maximum corrosion resistance
- Separate pumping systems ensure that clean water and waste are never mixed
- Suitable for use with holding tank
- Safely fitted above or below water line
- Oval, easy to clean vitreous white china pan
- At minimal extra cost you can specify left hand pumps set up

## SEACOCKS

When the only thing between you and the ocean is a seacock, it makes sense to be certain that it is the very best design and quality possible. Structurally sound and manufactured to specifications approved by organisations such as Lloyds and the MOD, these essential items are manufactured from the very highest specification marine grade metals and feature unique, built-in grease nipples to allow in-water servicing. We also supply specially formulated seacock grease.

# LAVAC TOILETS

**“THE WORLDS MOST RELIABLE SEA TOILET”**

**“VACUUM FLUSHING, NO MOVING PARTS AND EXCEPTIONAL RELIABILITY MAKES THIS THE MARINE TOILET THAT OTHERS TRY TO MATCH”**

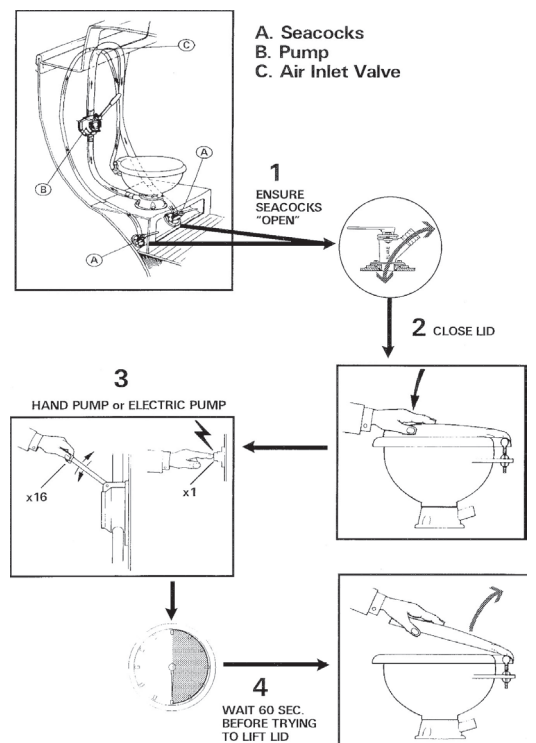

The LAVAC has earned the reputation of being the World’s most reliable sea toilet. Since its introduction, its patented vacuum flushing method has not been equalled by any other system. After use, simply close the seat and lid to complete the closed circuit seal. As waste is pumped out, the vacuum formed draws in replacement flushing water.

This simple, well-proven marine toilet will give continuous trouble free service and can be installed above or below the waterline.

It is particularly suitable for holding tank applications due to its minimal use of flushing water.

## LAVAC TOILETS – HOW THEY WORK

**SUPPLIED WITH LAVAC SANITARY HAND PUMP OR ELECTRIC PUMP**

# LAVAC POPULAR TOILET

New improved low profile Lavac Popular toilet.

The Lavac POPULAR is easily installed above or below the waterline. The patented vacuum flushing system is ideal for holding tanks where minimal flushing water is used.

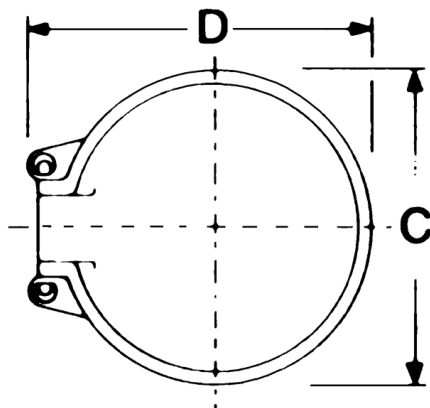

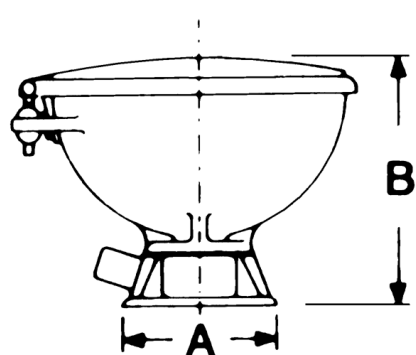

It is easy to clean and no moving parts minimises maintenance.

The Lavac POPULAR is supplied with a hard wearing Lavac sanitary pump - with a choice of either manual or electric pump.

## POPULAR MODEL

P/No	Description
TLZ0801	Popular T/A Hand Pump

## MARINE PUMPS

### SURE 12VOLT MACERATOR PUMP

Part No. 65.05

12V Macerator Pump  
 Power source: DC 12V  
 Inlet Diameter: 1 1/2"  
 Outlet Diameter: 1"  
 Current: 12 A  
 Delivery Head: 16 FT  
 Self-Priming up to 5 FT

### SURE 24VOLT MACERATOR PUMP

Part No. 65.06

24 V Macerator Pump  
 Power source: DC 24V  
 Inlet Diameter: 1 1/2"  
 Outlet Diameter: 1"  
 Current: 6 A  
 Delivery Head: 16 FT  
 Self-Priming up to 5 FT

# LAVAC SANITATION PUMPS

Evolved from our long and continuous research into marine pumps, these powerful and reliable pumps offer a long, trouble free working life. When it comes to fluid and semi-solid pumping, the Lavac pump is the best solution.

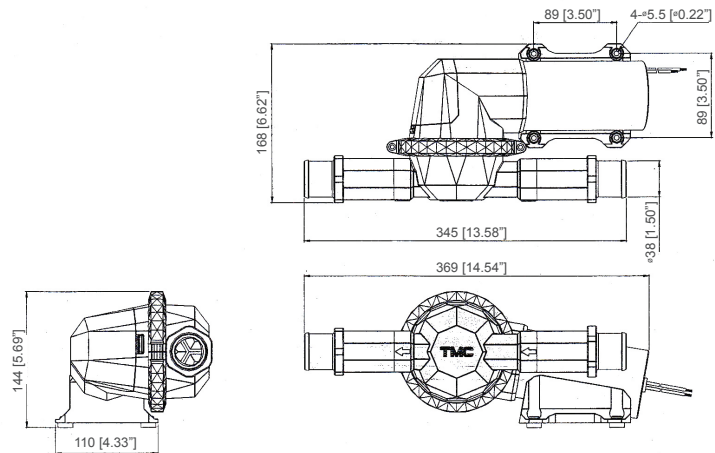

**Features:**

- Manufactured from corrosion resistant, marine grade materials
- Designed to give long and trouble free service
- Quick release inspection cover high quality, lightweight, ABS plastic body
- 38mm (1 1/2") inlet / outlet
- Various mounting position
- Large non-choke valves
- Tough plastic keeps in nasty smells
- Easy to service (no tools required)

## ELECTRIC PUMP

- Available in 12 or 24 Volts.
- Quiet operation
- Low power consumption 15 flushes from 1Ah

# TAYLOR'S HEATERS – PARAFFIN

**“EXTEND YOUR SEASON AND GET MORE OUT OF YOUR YACHTING WITH A SUPERBLY CRAFTED CLASSIC TAYLORS HEATER”**

## MODEL 079K PARAFFIN HEATER

The paraffin (Kerosene) version of this much-loved heater is fuelled from its own pump pressurised supply tank. The burner accessed from the front opening door is self cleaning and self pricking and like all Taylor's burners extremely reliable. This model provides a dry heat thus reducing condensation.

P/No	Description
HTK0531	Model 079 Kerosene Stainless Steel Front
HTK0521	Model 079 Kerosene Brass Front

### Features:

- Made of robust, high quality materials
- 2.1kw output
- Front opening door gives access for maintenance or adjustment.
- Supplied with 1.5 gallon tank, a safety on/off fuel control valve, in-line fuel filter, pipe work and fittings for installation.
- Externally vented and bulkhead mounted.
- Through-deck fitting flue sections also supplied.
- Stainless steel or Brass Front.

Option: To run both a heater and cooker from the same tank you will need:

CTK2405 Fuel line equal "T" 3/16" connection

### Taylor's Heaters Spare Parts:

HTKNOR	Paraffin heater normal kit
CTK1062	Paraffin burner spares kit for 2 burners
CTK1035P4GER	Tested Complete paraffin burner

*Available in Brass or Stainless Steel finish*

# TAYLOR'S HEATERS – DIESEL

## MODEL 079D DIESEL HEATER

Fuelled by generally available diesel, either from its own gravity tank (Header Tank version) or pumped direct from the boat's supply (main fuel tank version). The main fuel tank version Diesel cabin heater requires an electric supply which only uses 0.25 Ah per day.

### HEADER TANK VERSION

HTD0511	Model 079 Diesel Stainless Steel Front
HTD0501	Model 079 Diesel Brass Front

### MAIN FUEL TANK VERSION (PUMPED)

## RIPSTOP SPINNAKER REPAIR TAPE

This spinnaker and sail repair tape is a self-adhesive nylon tape and is ideal for reinforcing batten pockets and to carryout temporary repairs to torn sails. Can also be used to prevent chaffing.

- Other usage includes: Tear on clothing, tent, blind, umbrella
- Stick on PVC, Flexiglass or glass

P/No	DESCRIPTION
51.07	Ripstop 4.5m x 50mm white
51.08	Ripstop 4.5m x 50mm red
51.09	Ripstop 4.5m x 50mm royal blue
51.10	Ripstop 4.5m x 50mm light blue
51.11	Ripstop 4.5m x 50mm green
51.12	Ripstop 4.5m x 50mm black
51.13	Ripstop 4.5m x 50mm yellow
51.14	Ripstop 4.5m x 50mm orange
51.15	Ripstop 4.5m x 50mm purple
51.16	Ripstop 4.5m x 50mm pink
51.17	Ripstop 4.5m x 50mm lime yellow

# TAPE

## DUCT TAPE

Duct tape is a self adhesive waterproof cloth tape suitable for numerous repair jobs on all boats, dinghies and canoes. Available in 5 colors.

P/No	DESCRIPTION
51.21	Duct tape 50mm x 5m silver
51.22	Duct tape 50mm x 5m white
51.23	Duct tape 50mm x 5m red
51.24	Duct tape 50mm x 5m black
51.25	Duct tape 50mm x 5m blue
51.26	Duct tape 50mm x 5m silver
51.27	Duct tape 50mm x 5m black

## SAIL REPAIR TAPE

- Ideal for long lasting emergency sail repairs
- Suitable for all sails including heavy spinnakers
- Maintape and Kevlar tape can be edge stitched for a permanent repair
- Ideal for reinforcing batten pockets
- Great for anti-chafe applications. Apply to areas of sail that regularly come into contact with shrouds, spreader ends etc.

P/No	DESCRIPTION
51.18	Maintape - Heavy duty tape 1.5m x 100mm white
51.19	Mylar tape 3m x 50mm
51.20	Kevlar Heavy duty tape 1.5m x 50mm

## PTFE TAPE

Waterproof non-contaminating thread sealing tape for pipe connection and suitable for loose or tight fitting threads.

P/No	DESCRIPTION
51.42	PTFE tape 12m x 12mm

## HATCHSEAL TAPE

A rubber like strip on a self adhesive roll of tape. Perfect for sealing doors, hatches windows and also for bedding home fittings etc.

P/No	DESCRIPTION
51.35	Hatchseal Tape 3m x 19mm x 3mm black
51.36	Hatchseal Tape 3m x 19mm x 6mm black

# TAPE

## REFLECTIVE TAPE

- Reflectolite is a reflective self-adhesive yellow tape and ideal for night time identification given its light-reflection properties. Ideal for tenders, trailers and many on-board items.
- Daybrite is a daylight fluorescent self-adhesive tape perfect for lifejackets and sailing wear. Fluorescent orange.
- Reflexite is probably the brightest retro reflective tape on the market. Solas/DOT approved for safety equipment and life saving appliances.

P/No	DESCRIPTION
51.37	Reflectolite 5m x 19mm yellow
51.38	Daybrite 5m x 25mm fluorescent orange
51.39	Reflexite tape 1m x 50mm silver

## RIGGERS TAPE

High Quality waterproof cloth tape for many applications.

- Self adhesive
- Multiple anti-chafe applications, spreader ends, rigging screws, split pins etc
- Excellent for any other general repairs where narrow tape is required

P/No	DESCRIPTION
51.28	Riggers rape 10m x 25mm silver

## FINE LINE MASKING TAPE

A good quality low tack tape. Essential for most painting jobs on board.

P/No	DESCRIPTION
51.44	Fine line masking tape 65m x 19mm

## NON-SLIP DECK TAPE

P/No	DESCRIPTION
51.45	Non-slip deck tape 18m x 25mm
51.46	Non-slip deck tape 18m x 50mm

## HULLSTRIPE COVELINE

Tough, self adhesive and waterproof. Easy to apply.

P/No	DESCRIPTION
51.40	Hullstripe Coveline 10m x 15mm gold
51.41	Hullstripe Coveline 10m x 15mm silver

**1. GENERAL**

These terms and conditions of sale will form the basis of any contract between the Company and the Buyer and exclude any other terms and conditions inconsistent with them which the Buyer might seek to impose at any time. No variation of these terms and conditions is permitted unless expressly agreed in writing by a Director of the Company.

**2. CONSTRUCTION**

All contracts entered into by the Company will be subject to English Law and will be subject to the non-exclusive jurisdiction of the courts of England and Wales

**3. PRICES**

Unless Otherwise Stated any estimate or quotation provided by the Company will be valid for 30 days from the date of issue.

Goods will be invoiced at the price current at the date of despatch. The Company reserves the right to adjust the price at any time prior to delivery of the Goods to take account of increases in labour or material costs or currency fluctuations affecting imported Goods. Unless otherwise stated the quoted prices are net ex-works and are exclusive of carriage, insurance, packaging and VAT.

**4. DELIVERY**

Delivery is effected when the Goods leave the premises of the Company. Delivery dates are advised in good faith but the Company will not be liable for any loss caused by late delivery or its failure to make Goods available for collection on the due date.

The seller may deliver by instalments in such quantities as it may reasonably decide; such instalments shall be separate obligations and no breach in respect of one or more of them shall entitle the buyer to cancel any subsequent instalments or repudiate this contract as a whole.

**5. BREAKING LOADS**

The breaking loads given in this catalogue are for guidance only and are not guaranteed. They represent an average of tests carried out by ourselves using calibrated testing equipment.

**6. FORCE MAJEURE**

The Company shall not be liable for any failure to deliver the Goods arising from circumstances outside its control. These circumstances include, but are not limited to, the following:-

Act of God, war, riot, explosion, abnormal weather conditions, fire, flood, strikes, lockouts, Government (UK or other) actions or regulations, delay by suppliers, accidents, shortage of materials, labour or manufacturing facilities.

Should the Company be prevented from delivering in the above circumstances the Company will inform the Buyer as soon as reasonably practicable.

**7. RISK**

Risk in the Goods passes to the Buyer when the Goods are delivered to or collected by the Buyer or its agent.

**8. TITLE**

Title in the Goods shall not pass to the Buyer until the Goods have been paid for in full and all amounts owed by the Buyer to the Company for other Goods have been paid. So long as the Company is owed any amount by the Buyer, the Buyer may transfer title only as a fiduciary agent for the Company.

The Company may recover from the Buyer any Goods supplied by the Company if they have not been paid for, or if in the opinion of the Company serious doubts arise as to the solvency of the Buyer. In this situation the Company may enter upon any premises of the Buyer to remove such Goods.

**9. CLAIMS**

Goods shall be examined by the Buyer on delivery or collection, or should be signed for as 'unexamined'. Any shortages, damage or problems should be notified verbally within 3 days and in writing within 7 days of the date of delivery.

**10. PAYMENT**

All sums are due within 30 days of the date of delivery for credit account holders. In other cases payment will be required prior to delivery.

**11. RETURNS**

A restocking charge of 20% will be applied to all goods returned for credit due to error in ordering on the customers part, for whatever reason.

## IMPORTANT NOTICE

Product descriptions and illustrations contained in this catalogue are intended to give a general description only. Illustrations, sizes and descriptions are generally accurate but shall not be considered binding or part of a contract. SeaSure reserves the right to alter technical specifications without notice.
